

Purchasing tickets from two user at the same time

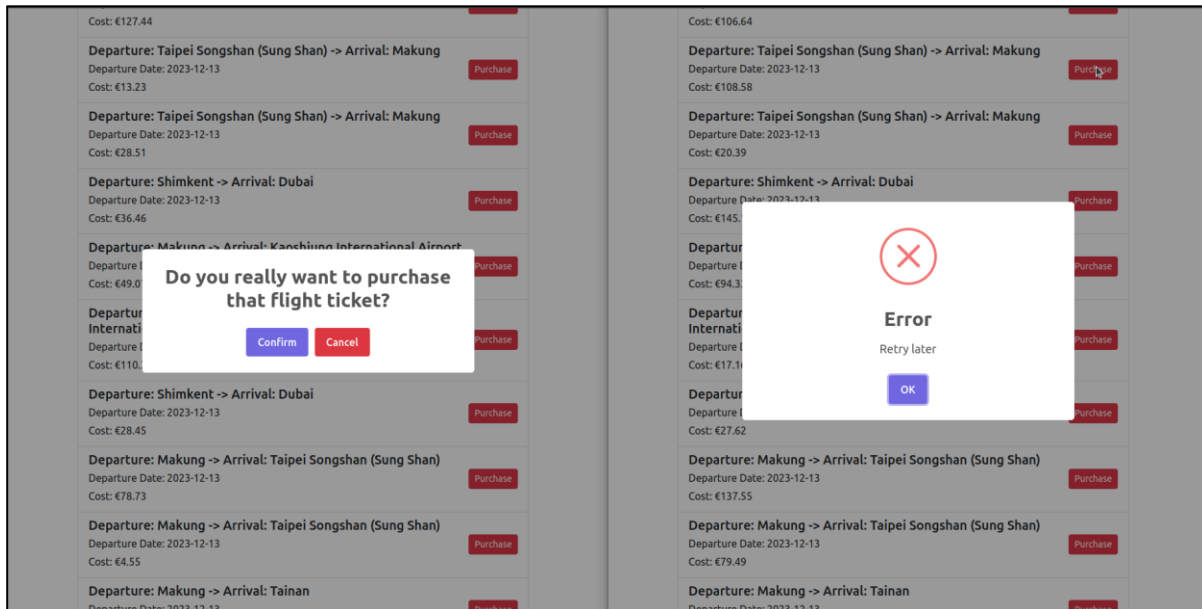

1) Login

Two side-by-side browser windows showing a login page. The left window shows a user with username 'client' and password '*****'. The right window shows a user with username 'client2' and password '*****'. Both windows have a 'Sign in' button and a 'Sign up' link.

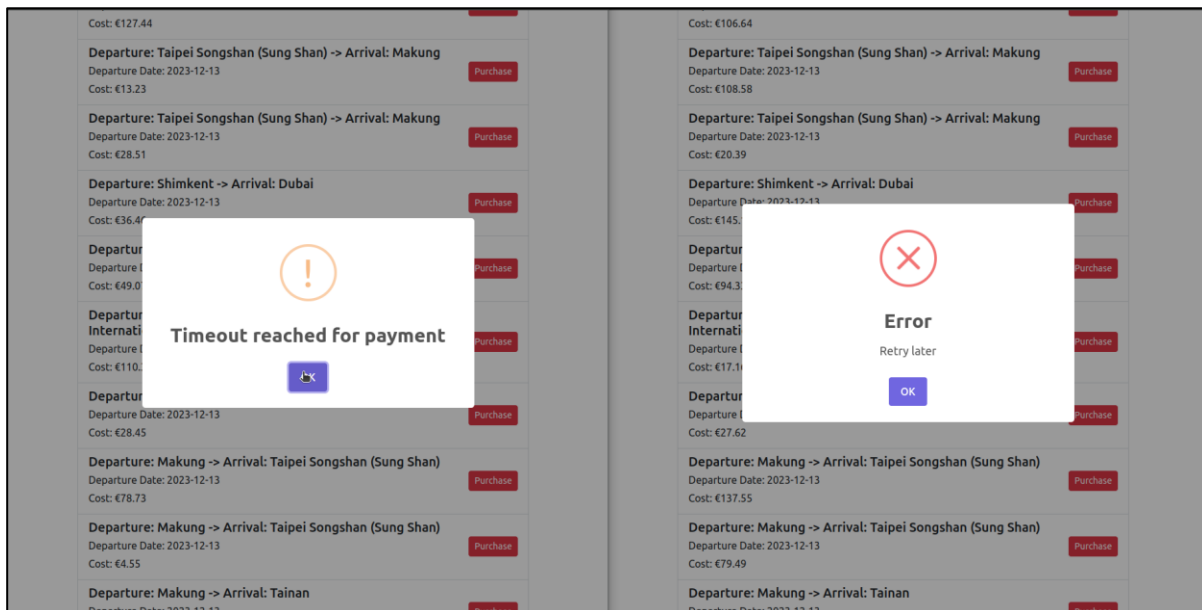

2) Choose the same flight and Click “Purchase” on both

Two side-by-side browser windows showing a flight selection page. The left window shows a list of flights with 'Purchase' buttons. The right window shows the same list of flights with 'Purchase' buttons. The flights are: Pulkovo -> Dubai, Taipei Songshan (Sung Shan) -> Makung, Shimkent -> Dubai, Makung -> Kaoshiung International Airport, Shimkent -> Nursultan Nazarbayev International Airport, Shimkent -> Dubai, Makung -> Taipei Songshan (Sung Shan), and Makung -> Taipei Songshan (Sung Shan).

- 3) The first window shows a modal to confirm the operation, while the second one notifies an error. If the first client “client” buys the ticket, it will no longer be available on the site and the second client “client2” can’t buy the same one.

- 4) If “client” doesn’t complete the operation in 30 seconds, abort the operation and

5) If both clients buy two different tickets the “My flights” section should be like the following one
