Purchasing tickets from two users at the same time
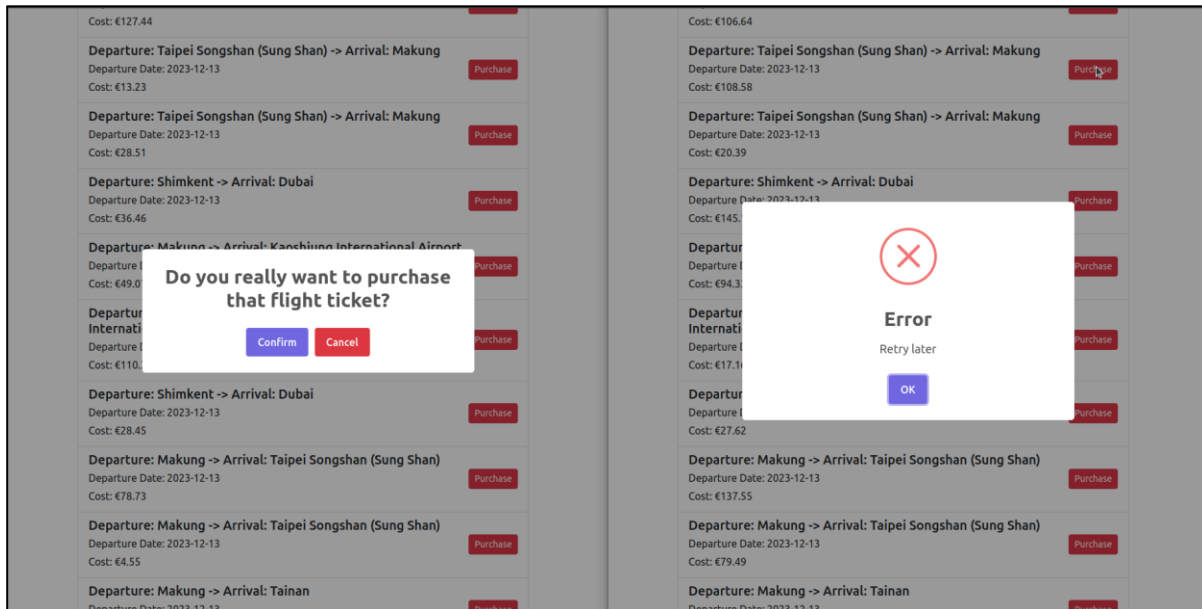

1) Login

2) Choose the same flight and Click "Purchase" on both.

3) The first window shows a modal to confirm the operation, while the second one notifies an error. If the first client "client" buys the ticket, it will no longer be available on the site and the second client "client2" can't buy the same one.

4) If "client" doesn't complete the operation in 30 seconds, abort the operation.
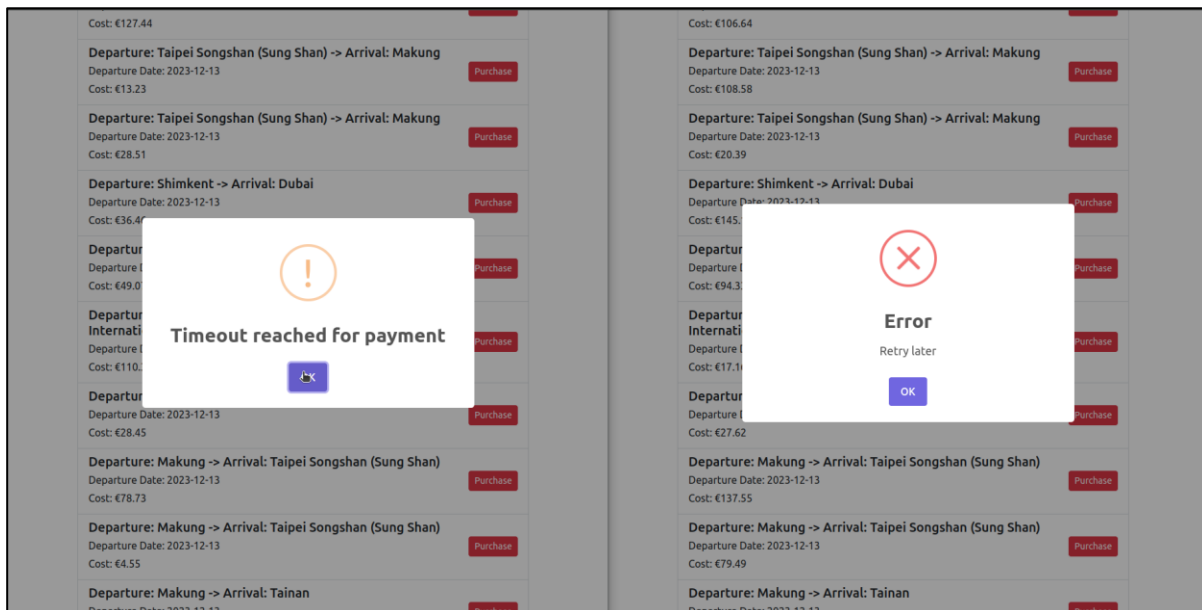

5) If both clients buy two different tickets the "My flights" section should be like the following one.

Flight List

Departure: Adelaide International Airport -> Arrival: Whyalla
Departure Date: 2023-12-14

Flight List

Departure: Pulkovo -> Arrival: Dubai
Departure Date: 2023-12-13
